

Quality Policy

ADMILL Ltd Quality Policy is to be a reliable supplier for defence and aerospace industry, and through continuous development and improvement of the Quality Management System, as well as meeting customers and other interested parties expectations – produce products of the highest quality at an acceptable price, and receive an opinion of a reliable and responsible partner for long-term cooperation.

Our objective is:

1. Enhancing customer satisfaction allowing to achieve planned business results.
2. Continuous strengthening the market position.
3. Effective prevention of nonconformities by eliminating its causes.
4. Systematic implementation of advanced management techniques, quality improvement and control.
5. Daily cooperation based on ethical behaviour.
6. Meeting regulatory and statutory requirements.
7. Taking care of the status of employees and for the environment.

We achieve this through:

- monitoring and analysis information coming from customers and other interested parties, improving indicators used for customer satisfaction evaluation,
- continuous improving personnel vocational skills,
- standardization of processes, education and development,
- promoting the principles of cooperation and fair treatment,
- reducing and eliminating mistakes caused by human factors,
- increasing technical production & measurement capabilities,
- fulfilling legal requirements within a scope of Labour H&S and environment protection.

On behalf of ADMILL Ltd Board of Management I do hereby declare that the Quality Policy as established and given above is accomplished on a daily basis, and the Management Board assures the necessary resources for accomplishment of its objectives.

President of the Board

Karol Wilk
